

Team&Team International
Annual Report

2017 Annual Report

The Charter of Team&Team Community

We are called to be a family to those who are suffering from war and disaster in our global society.

We practice unconditional love, disregarding differences in political values, religions and nationalities.

We volunteer ourselves for this mission that may bring us danger, and expect no compensation for the damage caused from the field operations.

Community is the core of our foundation and we commit our lives to one another.

	18	Campaigns & Events
	20	2017 Partners

We practice unconditional love through emergency relief and community development in regions of conflict and disaster in the world.

WHERE WE ARE

Kenya/Sudan : nairobi@teamandteamint.org / Sierra Leone : sierraleone@teamandteamint.org
Uganda : uganda@teamandteamint.org / Canada : canada@teamandteamint.org

Thanks to your love and
generous support,
2017 was filled with our community
able to shine hope upon dark areas
around the world.

Team&Team International vows to continually put the effort to help and deliver hope to our neighbors across the globe, in areas most destitute and to neighbors who are in pain.

To live up to your support and love, we will serve disaster areas with warm hearts and rebuild the areas dampened with disease with our professionalism.

We will commit ourselves to sincere, passionate engagement in efforts to facilitate your unconditional love to the global diffusion of the peace and welfare of humankind.

Thank you.

I wish you and your families well.

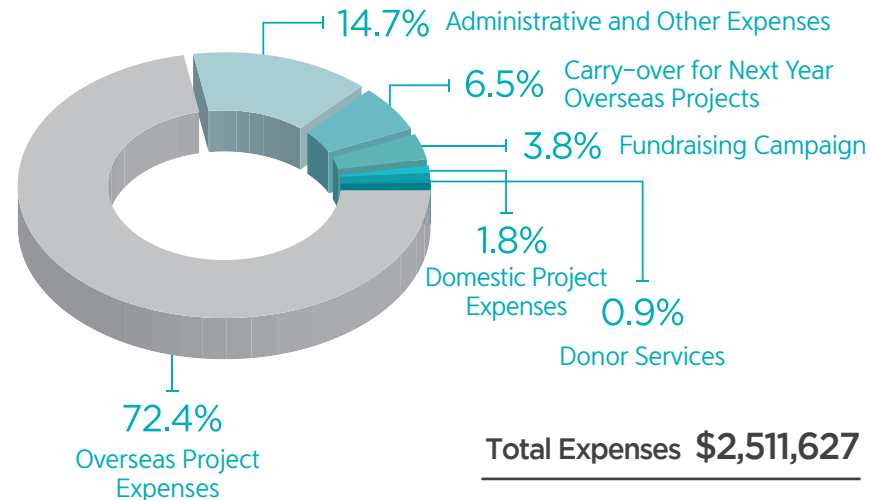

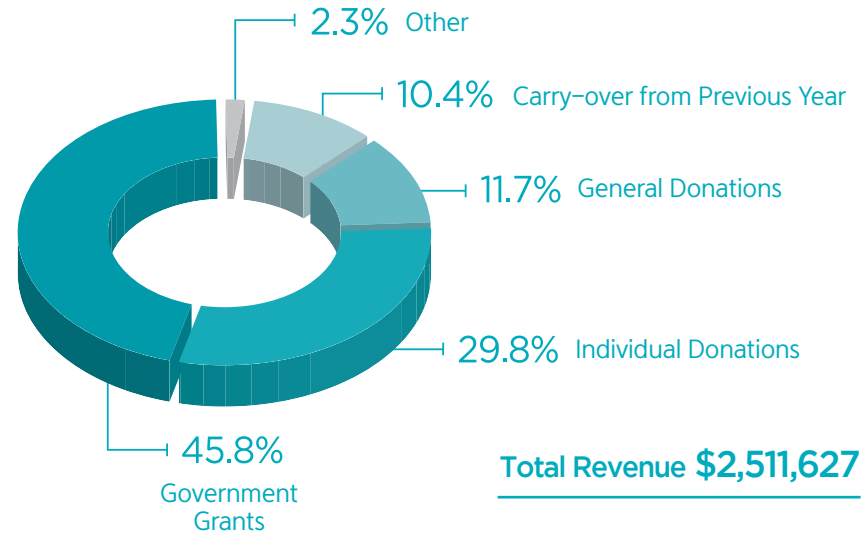

Kangsoo Baek,
Executive Director of Team&Team International

2017 Revenue & Expenses

We conducted variety of projects in 2017 in areas of conflict and disease across the world which enabled better lives for people in those areas.

We express sincere gratitude to our sponsors for their generous contributions and pledge ourselves to transparent and diligent management of our organization and accounting.

Team&Team reports audit and settlement of accounts to the National Tax Service and the Ministry of Foreign Affairs for transparent audit management and operation.

R e v e n u e		TOTAL (USD)	Details
ITEMS			
General Donations		294,126	Regular contributions from donating members of Team&Team
Individual Donations		749,009	Personal, companies and other types of donations for water development, emergency relief, and similar services

Carry-over to Next Year		162,566	Carry-over for next year overseas projects
Total		2,511,627	

WASH Program

We delivered hope to residents in the form of water.

Team&Team offers WASH support to the areas most in need, in the most appropriate form, by working with various parties such as local NGOs, the Korean government, UN organizations, and businesses. According to the UN, 1 dollar spent on clean water and hygiene facilities generates 9-fold economic returns. We provided water supplies and hygiene facilities and increased awareness of sanitized environments, contributing to residents' health, increased income, and a positive attitude towards training participation.

*WASH : Water supply, Sanitation and Hygiene promotion

33,060

Numbers of locals who were provided with access to drinking water

Kenya, Tana River County

Borehole drilling

Completed drilled boreholes : 30

People with clean drinking water : 7,032

Rehabilitation

Number of repaired pumps : 23

People with clean drinking water : 8,399

Prolonged droughts, which dried up the river entirely, made residents in Tana River County suffer from water and food shortage. It was challenging to gain access to clean water before the droughts, but it is now nearly impossible to gain water itself, including dirty water, as streams and rivers are dried up.

To resolve the drought issue in Tana River County, Team&Team cooperated with the local government to rehabilitate pumps and drill boreholes in villages whose existing fountains cannot provide clean water anymore due to obsolete facilities.

Kenya, Kilifi County

Benefited residents : **1,164** (130 households, 1 school)

Thanks to love from those who participated in Good Water Campaign 2017, we were able to deliver the gift of clean water to Maya village in Kilifi County. Residents of Maya village had to either use water in puddles or purchase drinking water at high costs from a neighboring village 4.5km away. The water supply was facing an imminent threat, but drilling boreholes was not feasible due to the village's proximity to the Indian Ocean, with high concentrations of salinity in the water.

Team&Team considered other options to provide drinking water, and came up with installing 7 rain harvesting systems that would leverage the local climate conditions of the rainy season. We also provided toilet facilities for an enhanced hygienic environment.

Uganda

Region : **Gulu, Adjumani, Amuru, Kotido, Luwero**

Completed drilled boreholes : **8**

People with clean drinking water : **7,574**

Team&Team Uganda, now a registered NGO in Uganda, launched a WASH program to provide safe water and an improved hygienic environment. Team&Team Uganda conducted new borehole drilling around areas suffering water shortage, and focused on training local experts with the help of Korean and Kenyan water development experts.

Kenya, Turkana County

Turkana host communities WASH project

Construction and rehabilitation of water/hygiene facilities

Hygiene kit distribution

Hygiene training and campaign

Benefited students : **254**

Team&Team provides aid regarding drinking water and hygiene so that refugee-accepting local communities as well as refugees can equally sustain life. We ran programs in Kalobeyei middle/high school to promote a hygienic environment and raise awareness in 2017, following 2016.

Our efforts were not limited to basic water supply and hygiene facility support. For female students to gain a better understanding of menstruation, we carried out lectures on hygienic menstruation and distributed cotton sanitary pad kits. Safe sex and hygiene education offered by us created an environment in which female students can break down menstruation-related superstitions and discuss it at will.

In our WASH DAY campaign in which all students participated, we arranged various activities such as a drawing competition and painting the outside wall of toilets so that students become interested in personal and public hygiene and manage their schools cleanly.

Sierra Leone, Port Loko & Kambia District

Completed Water Supply System : 1
 Completed drilled boreholes : 7
 Completed handwashing facilities and toilets : 9
 Number of residents who received clean water and an improved hygienic environment : **8,637**

Port Loko and Kambia in 2012 ranked 2nd and 3rd respectively in terms of death toll from cholera outbreak, demonstrating their vulnerability in terms of water sanitation and hygiene. Also, the rate of access to safe drinking water measures only 25%, as there is a shortage of drinking water and hygiene facilities available, with high exposure to waterborne epidemics.

To develop new boreholes and manage water quality constantly, Team&Team organized a Water Committee, conducted basic training for pump maintenance, and gave lectures on sanitation and hygiene to prevent waterborne epidemics.

Residents were once reluctant to approach training on facility maintenance, sanitation and hygiene due to high rates of illiteracy, but our staff in the field constantly put a great deal of effort into communicating with them, subsequently leading them to actively participate in activities.

Emergency Relief Program

Team&Team goes to areas in need of emergency relief and conducts the most effective method of relief response in the field of WASH.

Hygiene and sanitation are the most urgent priorities in areas affected by war and natural disaster. Ensuring access to safe drinking water is the first step to manage public health. We conduct emergency relief in the fields of water supply, sanitation, and hygiene to prevent the spread of epidemics and cure victims.

190,239

Number of benefited victims and refugees

Emergency relief in response to Sierra Leone flood and landslide

Emergency relief area : **the vicinity of Freetown, Western Rural**

Benefited victims after 1st response : **3,000** (600 households)

Benefited victims after 2nd response : **650**

Team&Team began emergency relief in August, 2017 in response to a landslide that victimized a total of 5,950 people.

In the 1st response, we focused on thorough management of hygiene in shelters for victims to prevent waterborne epidemics that could have broken out from prolonged rain. We provided hygiene kits that contained laundry basins, detergents, soaps, sanitary pads, and mosquito nets to enhance personal hygiene for victims.

In the 2nd response, we, in collaboration with Globalcare, an international medical relief organization, provided drinking facilities in victims' new residential areas. We installed photovoltaic water pumps, which can be used by approximately 600 people, for victims to have an easy access to safe, clean water.

WASH emergency relief in preparation for the outbreak of cholera in Kenya's UNHCR Nadapal transit center

Number of large-scaled borehole drillings completed : **1**

Completed hygiene facilities : **2**

Number of refugees who have direct access to clean water : **1,651**

Number of refugees who have indirect access to clean water : **184,938**

UNHCR Nadapal refugee transit center, located along the border between the Republic of South Sudan and Kenya, is a temporary shelter for refugees through which refugees fleeing from civil war in South Sudan to Kenya should pass to enter the refugee camps. With the rapid spread of cholera in South Sudan, it was highly likely that refugees fleeing to Nadapal could spread the disease and unhygienic conditions at the center could contribute to such outbreak too, leading to UNHCR requesting emergency relief.

To prevent cholera outbreak within the center, Team&Team dispatched emergency water tanks to provide safe drinking water to refugees. We also installed toilets and handwashing facilities, and completed borehole drilling to provide constant stream of water, setting up safe, hygienic environments. Such efforts blocked the possible route of a primary infection, preventing Kakuma and Kalobeyei Refugee Camp from falling victim to cholera outbreak.

Community Capacity Building

We supported residents' dreams through the power of education.

Team&Team supports residents to perceive local issues and build the capacity to resolve them on their own. We promote residents to become the primary agents of the projects so as to build a healthy life style and develop a sustainable local community.

20,186

Number of Residents Who Underwent Change Through Strengthening of Abilities

Program

WASH Capacity Building Projects

Region : Kenya, Tana River County

Number of Locals Who Have Completed Training : 186

Number of Locals Who Benefited from the Trainees' Activities : 20,186

Our WASH capacity improvement project, a long-term community capacity building project, aims to train locals to resolve various local issues, i.e. drinking clean water and maintaining good hygiene on their own by encouraging their will and developing capacity.

We conducted basic trainings in 10 villages, and conducted advanced trainings in another 10 villages in Tana River County, Kenya. Locals took part in advanced trainings through which they learned how to improve environments around the pumps, which could easily get dirty. We planted trees to prevent erosion around the pumps, and installed benches where locals can rest while waiting for their turn to use the pump. Fountains used to be for drinking purposes only, but after providing improvement activities, the site began to serve as a point of interaction for community members.

In the meantime, neighboring villages constantly asked trained villages, which had completed their WASH campaign training, to share their knowledge on WASH and pump rehabilitation skills, so some trainees shared the skills and knowledge with nearby villages. We expect ties among villages to grow firmer in the future, and that they will build capacity on their own through community spirit.

Humanitarian Aid Program

We assured the fundamental rights of refugees by providing safe drinking water and building up sanitary, hygienic environments.

Water is a fundamental right, and serves to uphold human dignity. By providing safe drinking water, essential to sustain human life, and building up sanitary, hygienic environments, we help to normalize the residents' lives in the field of WASH (Water Supply, Sanitation & Hygiene)

224,798

Number of Refugees Who Have Access to Clean Water

Kenya Kalobeyei Refugee Camp Program

Region : **Turkana County, Kalobeyei Refugee Camp**

Number of Large-Scale Borehole Drillings Completed : **5**

Number of Hygiene Facilities Within Public Areas : **2**

Number of Kalobeyei Camp Refugees Who Have Direct Access to Clean Water : **38,363**

Number of Kalobeyei Camp Refugees Who Have Indirect Access to Clean Water : **186,435**

As an official partner of the UNHCR (UN Refugee Agency) since 2014, Team&Team has been building up water supply systems within Kakuma Refugee Camp and Kalobeyei Refugee Camp, Turkana County, Kenya. With water supply systems in place, the WHO (World Health Organization) recommendation of 20 liters of water per person per day can be fulfilled in the improved camp conditions.

Even though hygienic facilities were built in 2017 as a response to cholera outbreak in the Kalobeyei refugee registration center, there were concerns about the management of facilities due to a lack of manpower in the peak of influx of new refugees. To resolve such issues, we selected some of the refugees from the neighboring Kakuma refugee camp and trained them to be able to manage the facilities and give instruction about correct usage and basic hygiene practices. They became hygiene promoters by themselves and promoted trainings on correct toilet usage in the center, and to wash hands the correct way.

Campaign & Participation

It was the participation of a number of donors and supporters which made it possible to provide water to areas in need across the globe. We share Team&Team's major campaigns and sharing activities for the year of 2017.

Special fundraising in commemoration of World Water Day, with Solace Soap delivering life from pure water and consolation

Residents of Turkana County, Kenya, are not guaranteed fundamental right to life in their poor residential environments. Humanitarian aid for residents who have suffered from damaging droughts is urgently called for, but this call has been neglected within the field of international aid and protection.

In commemoration of World Water Day, March 22nd, we launched 'Solace Soap' fundraising to provide clean water and support hygienically improved conditions of dwellings for students from Kalobeyei middle/high school.

The Good Water Concert Blooming Africa

The Good Water Concert is Team&Team's signature charity concert to raise donations, the full amount of which will be spent providing drinking water in Africa. With Saxophonist Gwang-sig Park, live performing bands, and audiences, we enjoyed this moment of appreciating the meaning of sharing.

The Good Water Concert 2017 was actually able to contribute more than the previous year, largely thanks to our sponsor TJ Media's decision to donate an additional amount matching that of the ticket sales. Proceeds from the concert were spent for pump rehabilitation activities in Tana River County, Kenya, and for Sierra Leone emergency relief.

Goyang International Flower Festival in Collaboration with Teraria

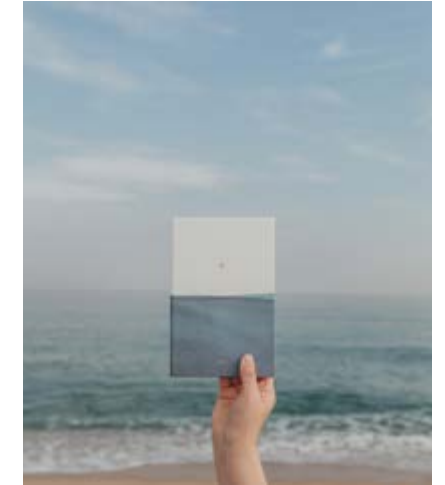

Team&Team, in collaboration with Teraria, participated in the Goyang International Flower Festival held in Lake park, Goyang-si. We organized quiz sessions and waterborne epidemic prevention game for audiences to raise awareness of the challenges African children face when securing water and of the importance of clean drinking water. Also, sales of air cleaning plant Scandiamoss, prepared to promote our message of delivering clean water, drew a great response from audiences, leading to the raising of funds which were used for Sierra Leone emergency relief.

Team&Team International Supporters' Night

On November 23, the Team & Team International Supporters' Night was held in order to look back at the footsteps of Team & Team International over the last 18 years and thank the supporters who have been with us along the journey.

We held a session to talk about our past programs and changes since made with the executive director Yong-joo Lee and Kenyan representative Samwel. Our honorary ambassador Ji-hye Han, an actress, also participated in the event in the form of a mini talk show, and Solnamoo Song, a flutist, shared his talent through performances, sending the power of the love of those who want to do good.

The Good Water Campaign, Your Love Fills Africa with Happiness

Vumbwe village is one of villages in Tana River County, Kenya, that suffer from the prolonged droughts in East Africa. Residents participated in Team&Team's WASH capacity improvement program, through which they build capacity to resolve drinking water, sanitation and hygiene issues on their own without external aid, and are learning to overcome challenges. Team&Team presented, as a 2017 campaign reward, The Good Water Diary, which contains secrets for happiness learned from Vumbwe residents who never lost their smiles and composure even during hardships. It drew approximately 3,400 people's participation via Naver Happybean funding, and proceeds therefrom will be spent on WASH capacity improvement activities for residents in Tana River country, Kenya, including Vumbwe village.

“It was such a great experience that students interested in international development and Africa gathered together, learned about drinking water issues, and tried to find a way to raise awareness of such issues. With several engagements in campaigns, I came to realize how important WASH projects are, and how much value Team&Team projects create. As a former Teammaker, I will stay engaged in Team&Team’s work and raise awareness of the global water shortage.”

▸ Hyeon-seok Kim,
Student Volunteer Group Teammaker 1

“I found it amazing that we could give the gift of health and happy life in the form of water. I believe every donor’s share of love plants a seed of hope in Africa, presenting gift of life there.”

▸ Ji-hye Han, Honorary Ambassador

“I was so glad to participate in social responsibility for Africa, a land I had always wanted to visit someday. It was a happy year when I could share Team&Team’s work and its on-field activities with customers visiting our Think Coffee. I would like to get involved in on-field activity sometime soon.”

▸ Yun-tae Kim,
Team Lead of Sponsor Think Coffee

“When we were poor, my cousin’s friend, gave me a pad of 50 strawboard papers every month to encourage my study. It seems like nothing today when we can afford almost everything, but back then, it was a huge encouragement and I was greatly thankful for that, because he must have been equally poor, too. I think my donation today is equivalent to those 50 strawboard papers. I do not want to wait until I am wealthy enough to give big things, but rather give support to those in imminent need.”

▸ Ok-ja Park, Donor

“While working as a member of a monitoring group, I realized that donations mean not only support from far away, but also walking together towards a goal. While communicating with Team&Team and meeting other sponsors, I came to understand that changes in Africa could be made not only through individual donations but community spirit.”

▸ Chung-gil Jang, Monitoring Group Teammate 3

“Water, to the residents, was not just something for drinking and cooking. It was ‘necessity,’ ‘hope,’ and a foundation stone on which to live a new life. Team&Team’s work is not just a simple aid, but stimulus that boosts them and helps them get back on their feet on their own.”

▸ Si-yeong Jang,
Donor Who Has Visited the Site in Kenya

2017 Partners

We introduce our donors and supporters who were happy to be part of us in 2017.

OUR VISION

We strive to transform the world of suffering into a community full of life and hope.

OUR MISSION

We practice unconditional love through emergency relief and community development in regions of conflict and disaster in the world.

OUR CORE VALUES

- Human Dignity
- Integrity
- Family Community
- Professionalism
- Pioneer Spirit
- Partnership
